Forward-Looking Statements

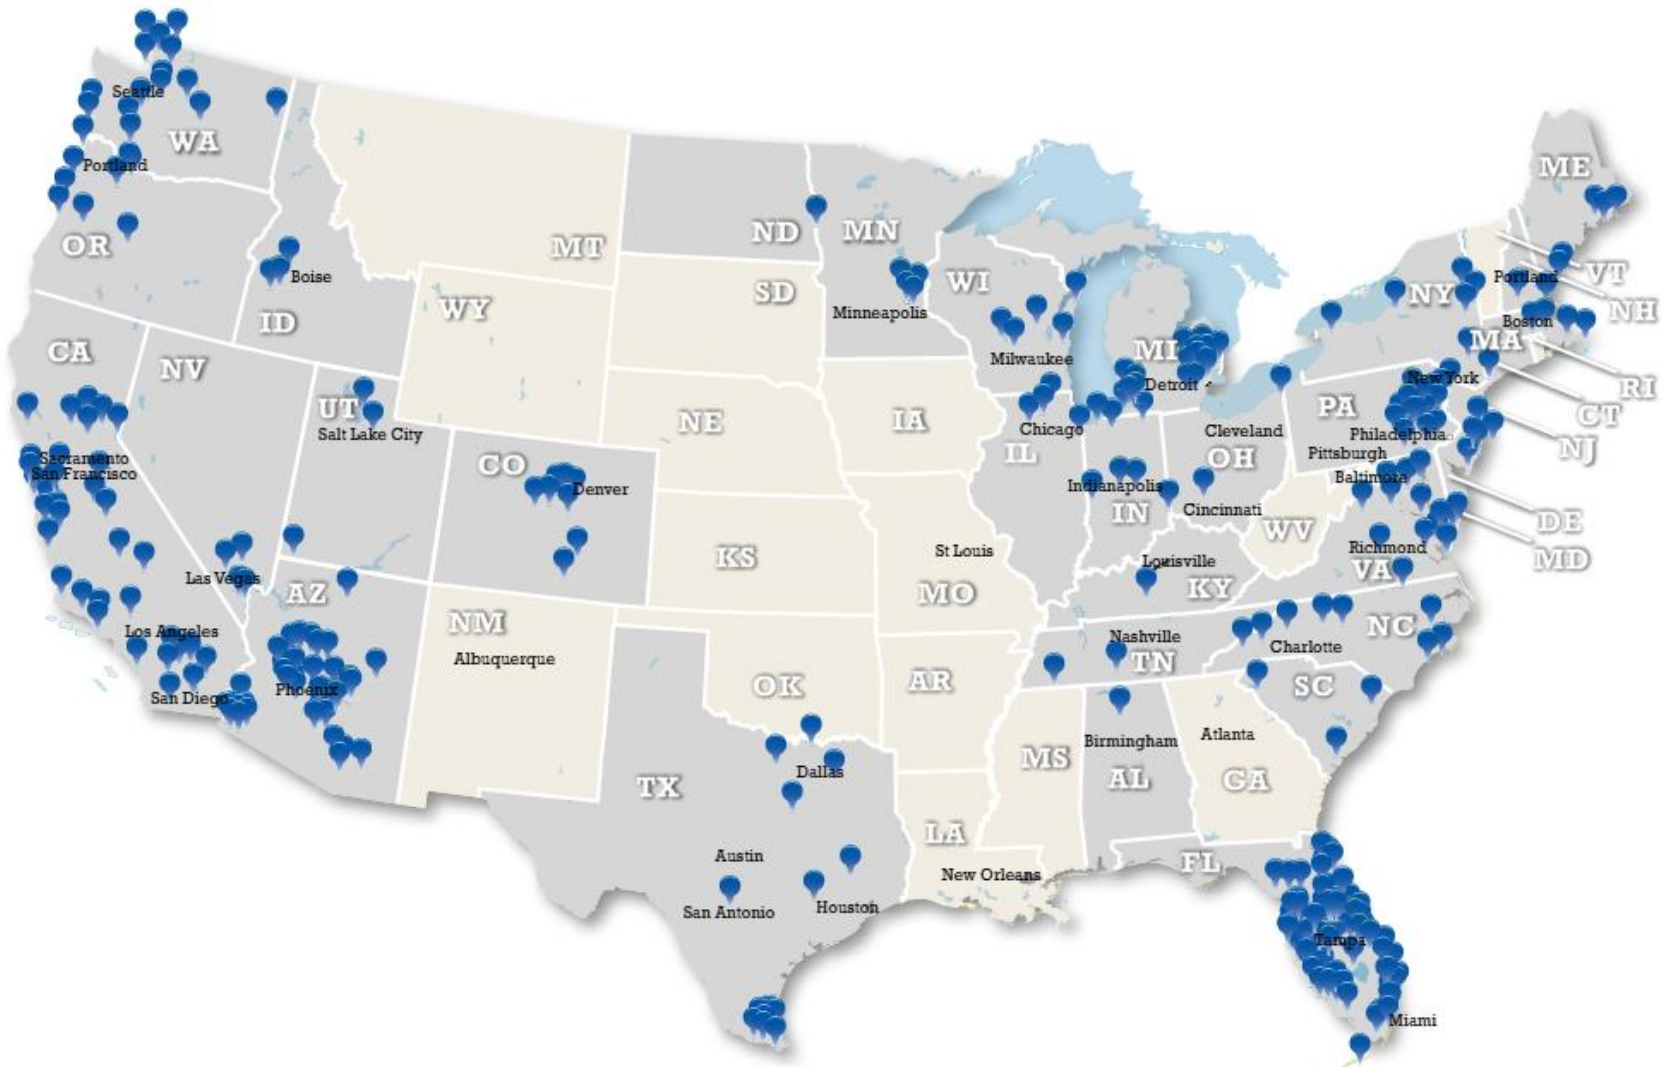

- This presentation includes certain “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. When used, words such as “anticipate,” “expect,” “believe,” “project,” “intend,” “may be” and “will be” and similar words or phrases, or the negative thereof, unless the context requires otherwise, are intended to identify forward-looking statements and may include, without limitation, information regarding the Company’s expectations, goals or intentions regarding the future, and the expected effect of the recent acquisitions on the Company. These forward-looking statements are subject to numerous assumptions, risks and uncertainties, including, but not limited to:
 - ▶ the Company’s ability to control costs, real estate market conditions, the actual rate of decline in customers, the actual use of sites by customers and its success in acquiring new customers at its Properties (including those that it may acquire);
 - ▶ the Company’s ability to maintain historical rental rates and occupancy with respect to Properties currently owned or that the Company may acquire;
 - ▶ the Company’s ability to retain and attract customers renewing, upgrading and entering right-to-use contracts;
 - ▶ the Company’s assumptions about rental and home sales markets;
 - ▶ the Company’s assumptions and guidance concerning 2012 and 2013 estimated net income and funds from operations;
 - ▶ the Company’s ability to manage counterparty risk;
 - ▶ in the age-qualified Properties, home sales results could be impacted by the ability of potential homebuyers to sell their existing residences as well as by financial, credit and capital markets volatility;
 - ▶ results from home sales and occupancy will continue to be impacted by local economic conditions, lack of affordable manufactured home financing and competition from alternative housing options, including site-built single-family housing;
 - ▶ impact of government intervention to stabilize site-built single family housing and not manufactured housing;
 - ▶ effective integration of the recent acquisitions and the Company’s estimates regarding the future performance of the recent acquisitions;
 - ▶ unanticipated costs or unforeseen liabilities associated with the recent acquisitions;
 - ▶ ability to obtain financing or refinance existing debt on favorable terms or at all;
 - ▶ the effect of interest rates;
 - ▶ the dilutive effects of issuing additional securities;
 - ▶ the effect of accounting for the entry of contracts with customers representing a right-to-use the Properties under the Codification Topic “Revenue Recognition,” and
 - ▶ other risks indicated from time to time in the Company’s filings with the Securities and Exchange Commission.
- These forward-looking statements are based on management’s present expectations and beliefs about future events. As with any projection or forecast, these statements are inherently susceptible to uncertainty and changes in circumstances. The Company is under no obligation to, and expressly disclaims any obligation to, update or alter its forward-looking statements whether as a result of such changes, new information, subsequent events or otherwise.

Non GAAP Financial Measures

Funds from Operations (“FFO”) is a non-GAAP financial measure. The Company believes that FFO, as defined by the Board of Governors of the National Association of Real Estate Investment Trusts (“NAREIT”), is generally an appropriate measure of performance for an equity REIT. While FFO is a relevant and widely used measure of operating performance for equity REITs, it does not represent cash flow from operations or net income as defined by GAAP, and it should not be considered as an alternative to these indicators in evaluating liquidity or operating performance.

The Company defines FFO as net income, computed in accordance with GAAP, excluding gains or actual or estimated losses from sales of properties, plus real estate related depreciation and amortization, and after adjustments for unconsolidated partnerships and joint ventures. Adjustments for unconsolidated partnerships and joint ventures are calculated to reflect FFO on the same basis. The Company receives up-front non-refundable payments from the entry of right-to-use contracts. In accordance with GAAP, the upfront non-refundable payments and related commissions are deferred and amortized over the estimated customer life. Although the NAREIT definition of FFO does not address the treatment of nonrefundable right-to-use payments, the Company believes that it is appropriate to adjust for the impact of the deferral activity in its calculation of FFO. The Company believes that FFO is helpful to investors as one of several measures of the performance of an equity REIT. The Company further believes that by excluding the effect of depreciation, amortization and gains or actual or estimated losses from sales of real estate, all of which are based on historical costs and which may be of limited relevance in evaluating current performance, FFO can facilitate comparisons of operating performance between periods and among other equity REITs. The Company believes that the adjustment to FFO for the net revenue deferral of upfront non-refundable payments and expense deferral of right-to-use contract commissions also facilitates the comparison to other equity REITs. Investors should review FFO, along with GAAP net income and cash flow from operating activities, investing activities and financing activities, when evaluating an equity REIT’s operating performance. The Company computes FFO in accordance with its interpretation of standards established by NAREIT, which may not be comparable to FFO reported by other REITs that do not define the term in accordance with the current NAREIT definition or that interpret the current NAREIT definition differently than the Company does. FFO does not represent cash generated from operating activities in accordance with GAAP, nor does it represent cash available to pay distributions and should not be considered as an alternative to net income, determined in accordance with GAAP, as an indication of the Company’s financial performance, or to cash flow from operating activities, determined in accordance with GAAP, as a measure of the Company’s liquidity, nor is it indicative of funds available to fund its cash needs, including its ability to make cash distributions.
