Equity LifeStyle Properties
Our Story

• One of the nation’s largest real estate networks with 406 properties containing 151,323 sites in 32 states and British Columbia

• Unique business model
  ▶ Own the land
  ▶ Low maintenance costs/customer turnover costs
  ▶ Lease developed sites

• High-quality real estate locations
  ▶ More than 90 properties with lake, river or ocean frontage
  ▶ More than 100 properties within 10 miles of coastal United States
  ▶ Property locations are strongly correlated with population migration
  ▶ Property locations in retirement and vacation destinations

• Stable, predictable financial performance and fundamentals
  ▶ Balance sheet flexibility

• In business for more than 40 years
Steady, Predictable Revenue Streams

Property/Site composition\(^{(1)}\)

- 205 manufactured/resort home communities
  - 73,000 sites
- 190 RV resorts
  - 76,200 sites
  - Annuals 28,800
  - Seasonal 11,600
  - Transient 11,700
  - Membership sites 24,100

Note:
(1) Property and site counts exclude Marina JV investment properties.
(2) Property operating revenue buckets reflect estimated 2018 property operating revenues, derivable from our guidance included in Exhibit 99.1 to the Form 8-K filed with the SEC on January 30, 2018 ("ELS Reports Fourth Quarter Results").
Our Lifestyle Options

• Customers own the units they place on our sites
  ▶ Manufactured homes
  ▶ Resort cottages (park models)
  ▶ Recreational vehicles

• We offer a lifestyle and a variety of product options to meet our customers’ needs

• We seek to create long-term relationships with our customers
Favorable Customer Demographics

- The population of people age 55 and older is expected to grow 22% from 2018 to 2033
- Roughly 10,000 Baby Boomers will turn 65 every day through 2030

Non-GAAP Financial Measures

This document contains certain non-GAAP measures used by management that we believe are helpful in understanding our business, as further discussed in the paragraphs below. We believe investors should review these non-GAAP measures, along with GAAP net income and cash flow from operating activities, investing activities and financing activities, when evaluating an equity REIT’s operating performance. Our definitions and calculations of these non-GAAP financial and operating measures and other terms may differ from the definitions and methodologies used by other REITs and, accordingly, may not be comparable. These non-GAAP financial and operating measures do not represent cash generated from operating activities in accordance with GAAP, nor do they represent cash available to pay distributions and should not be considered as an alternative to net income, determined in accordance with GAAP, as an indication of our financial performance, or to cash flow from operating activities, determined in accordance with GAAP, as a measure of our liquidity, nor is it indicative of funds available to fund our cash needs, including our ability to make cash distributions.

**Funds from Operations (FFO).** We define FFO as net income, computed in accordance with GAAP, excluding gains and actual or estimated losses from sales of properties, plus real estate related depreciation and amortization, impairments, if any, and after adjustments for unconsolidated partnerships and joint ventures. Adjustments for unconsolidated partnerships and joint ventures are calculated to reflect FFO on the same basis. We compute FFO in accordance with our interpretation of standards established by the National Association of Real Estate Investment Trusts ("NAREIT"), which may not be comparable to FFO reported by other REITs that do not define the term in accordance with the current NAREIT definition or that interpret the current NAREIT definition differently than we do. We receive up-front non-refundable payments from the entry of right-to-use contracts. In accordance with GAAP, the upfront non-refundable payments and related commissions are deferred and amortized over the estimated customer life. Although the NAREIT definition of FFO does not address the treatment of non-refundable right-to-use payments, we believe that it is appropriate to adjust for the impact of the deferral activity in our calculation of FFO.

**Normalized Funds from Operations (Normalized FFO).** We define Normalized FFO as FFO excluding the following non-operating income and expense items: a) the financial impact of contingent consideration; b) gains and losses from early debt extinguishment, including prepayment penalties and defeasance costs; c) property acquisition and other transaction costs related to mergers and acquisitions; and d) other miscellaneous non-comparable items. Normalized FFO presented herein is not necessarily comparable to Normalized FFO presented by other real estate companies due to the fact that not all real estate companies use the same methodology for computing this amount.

We believe that FFO and Normalized FFO are helpful to investors as supplemental measures of the performance of an equity REIT. We believe that by excluding the effect of depreciation, amortization, impairments, if any, and actual or estimated gains or losses from sales of real estate, all of which are based on historical costs and which may be of limited relevance in evaluating current performance, FFO can facilitate comparisons of operating performance between periods and among other equity REITs. We further believe that Normalized FFO provides useful information to investors, analysts and our management because it allows them to compare our operating performance to the operating performance of other real estate companies and between periods on a consistent basis without having to account for differences not related to our operations. For example, we believe that excluding the early extinguishment of debt, property acquisition and other transaction costs related to mergers and acquisitions from Normalized FFO allows investors, analysts and our management to assess the sustainability of operating performance in future periods because these costs do not affect the future operations of the properties. In some cases, we provide information about identified non-cash components of FFO and Normalized FFO because it allows investors, analysts and our management to assess the impact of those items.
